The programme's courses and the final project are designed around the real-world integration of business disciplines.

Pre-Term module (online)
- Probability
- Descriptive Statistics
- R
- Python & Data Structures
- RDBMS

Modules
- Big Data Management
- Business Fundamentals
- Data Collection
- Data Mining 1: Unsupervised Learning
- Data Mining 2: Supervised Learning
- Data Visualization
- Deep Learning and IoT
- Financial Analytics
- Forecasting Analytics
- Marketing Analytics
- Optimization
- Practicum and Critical Thinking using Data
- Pricing Analytics
- Retail and Supply Chain Analytics
- SAS (optional)
- Simulation
- Social Media and Web Analytics
- Statistical Analysis 1: Estimation and Testing
- Statistical Analysis 2: Regression Modeling
- Statistical Analysis 3: Advanced Methods
- Text Analytics
- Capstone Project (for three months after Term 3)

Pedagogy
- Case studies
- Mini projects
- Capstone Projects
- Simulations
- Extensive tutorials
- Online/offline evaluations
- Peer learning

Certificate Programme in Business Analytics

• The programme is designed on a schedule that minimizes disruption of work and personal pursuits.

• The programme is a combination of classroom and Technology aided learning platform. Participants are on campus for a Five-day schedule of classroom learning every alternate month for a span of 12 months, which is ideally be planned to include a weekend.

• With 430+ contact hours, the programme is rigorous and in-depth.

• In the month where there is no classroom connect, the classes will be conducted over a technology aided learning platform.

• CBA is a rigorous and challenging programme. The schedule includes full days of teaching and evenings are used for guest lectures, projects, and group work. Participants are required to stay on campus during those classroom days.

• Capstone Project: There will be an action learning project, which will be performed under a faculty and industry mentor.

• Industry Speakers/Visits: An integral part of the CBA is interactions with industry speakers and regular visits to relevant organisations throughout the course.

• Faculty: Renowned faculty from premier business and engineering schools across the world, and Subject Matter Experts (SME) from the Industry.

• Curriculum: The curriculum has been designed in tandem with inputs from Industry and academia. The course has an academic rigor and candidates are graded accordingly.
