

Jobs for Physically Challenged

Job Portal for the Physically Disabled

Team: Satya Naresh, L. Ravichander, Sunil Karamsetty, S.S.Jagadeeswari

Jobsforphysicallychallenged.com is an exclusive job portal for people who are physically challenged.

The proportion of disabled in India as per census 2001 is 2.13 percent of total population. Classification of disabled population by different categories of disabilities shows that the highest proportions of people with disabilities have seeing disabilities, followed by movement disability.

People with disabilities find it difficult to find employers who can accommodate them. We have created a job portal exclusively to work for the empowerment of the disabled and help them find jobs. At the same time we work with organizations to help them recruit these people with disabilities. We act as a bridge between the physically challenged people and corporates and connect both of them to meet recruitment needs, help the physically challenged in getting a job and help corporates in their corporate social responsibility to employing physically challenged. Jobsforphysicallychallenged aims to project people who have succeeded at their chosen professions despite their disabilities and help others realize their potential.

While there are many job portals that help in providing jobs to millions and there are several NGOs who help the disabled, there is need for a sustainable organization working in this area. By charging corporates for job postings and search, jobsforphysicallychallenged.com intends to generate revenues and sustain operations.

JobsForPhysicallyChallenged.com has recently had its first success by providing employment for 10 physically challenged job seekers in an Ahmedabad based software company.
